Uvod

Korišćeni programski jezici

Za potrebe kreiranja sajta korišćene su sledeće tehnologije:

- PHP
- HTML
- CSS
- XAMPP
- MySQL
- Bootstrap
- JavaScript I jQuery

Kucano u programu Visual Studio Code

Opis funkcionalnosti

Funcionalnosti sajta su:

- Sajt je responsive I prilagođen je svim veličinama ekrana
- Navigacioni meni se prikazuje kao hamburger meni na manjim rezolucijama
- Head, navigacija I footer se učitavaju iz zasebnih PHP fajlova
- Korisnik ima mogućnost da izabere više usluga ali svaku uslugu može samo jednom
- Korisnik može da unese svoju fotografiju nakon prijavljivanja
- Korisnik ima mogućnost da popuni anketu i vidi utiske ostalih korisnika za date usluge
- Prikaz dijagrama usluga olakšava novim korisnicima lakši odabir
- Kontakt forma se pamti u bazi i prikazuje adminu
- Admin ima mogućnost dodavanja kategorija, brisanja I ažuriranja usluga

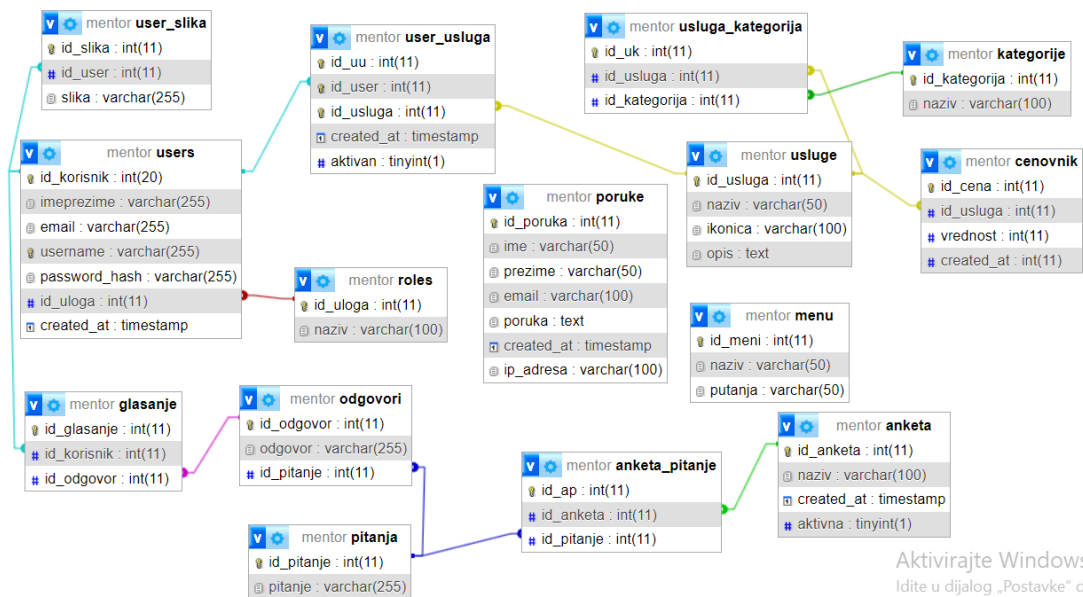

- Admin može da pregleda sve usluge korisnika, da ih aktivira, deaktivira ili ukloni
- Admin ima uvid na korisničke ankete
- Dinamički ispisane informacije o korisniku
- Prikaz poruka iz kontakt forme na adminovom profilu
- Logovanje i registracija se proverava regularnim izrazima u JavaScript-u i u PHP-u i sve stranice su zaštićene od neautorizovanih korisnika

Template

Za izradu sajta nije korišćen nijedan template

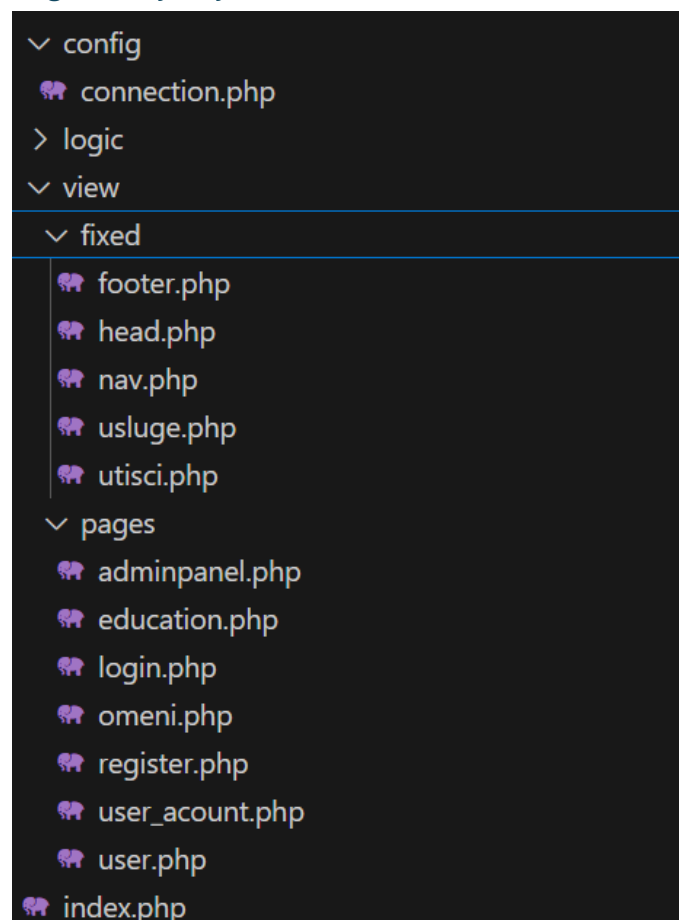

Organizacija

Organizaciona šema

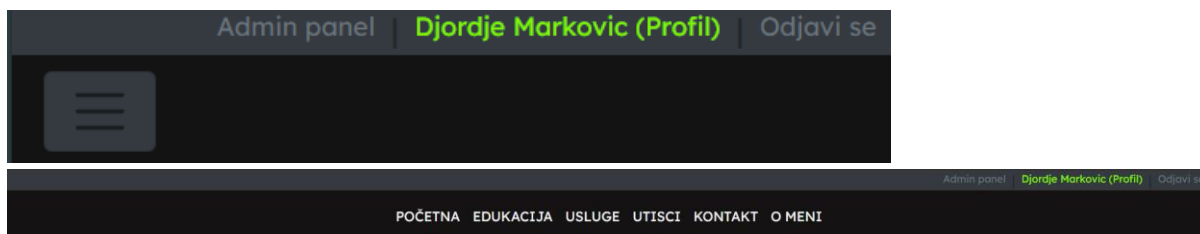

Aktivirajte Windows
 Idite u dijalog „Postavke“ da biste a

Organizacija fajlova

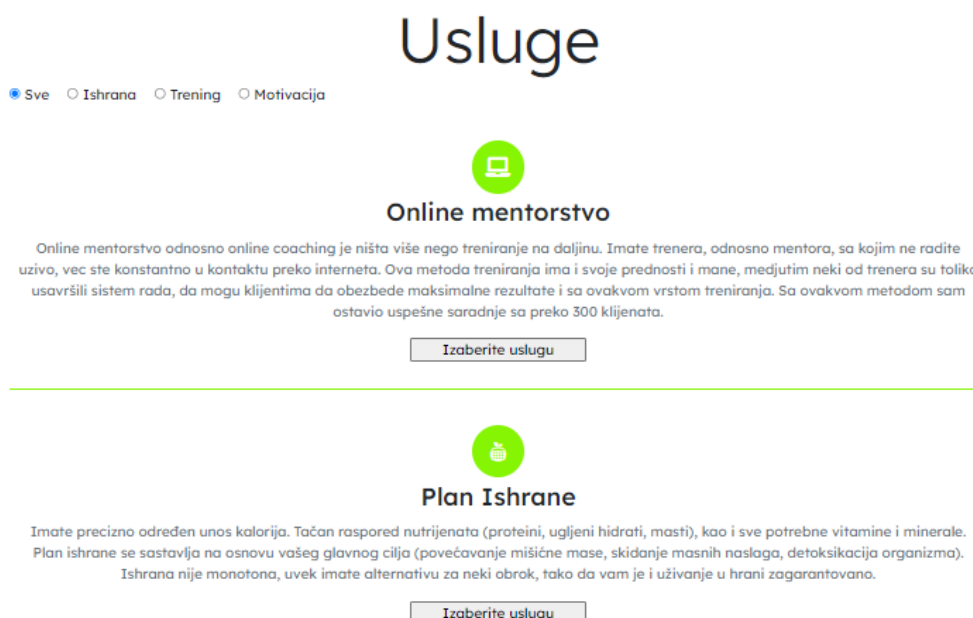

Opis funkcionalnosti

Na svakoj strani se nalaze navigacioni meni, koji se na manjim rezolucijama prikazuje kao hamburger, I futer. Navigacioni meni se menja u zavisnosti od toga da li je ulogovan korisnik ili nije. Admin u navigaciji dobija opciju admin panel.

Index.html

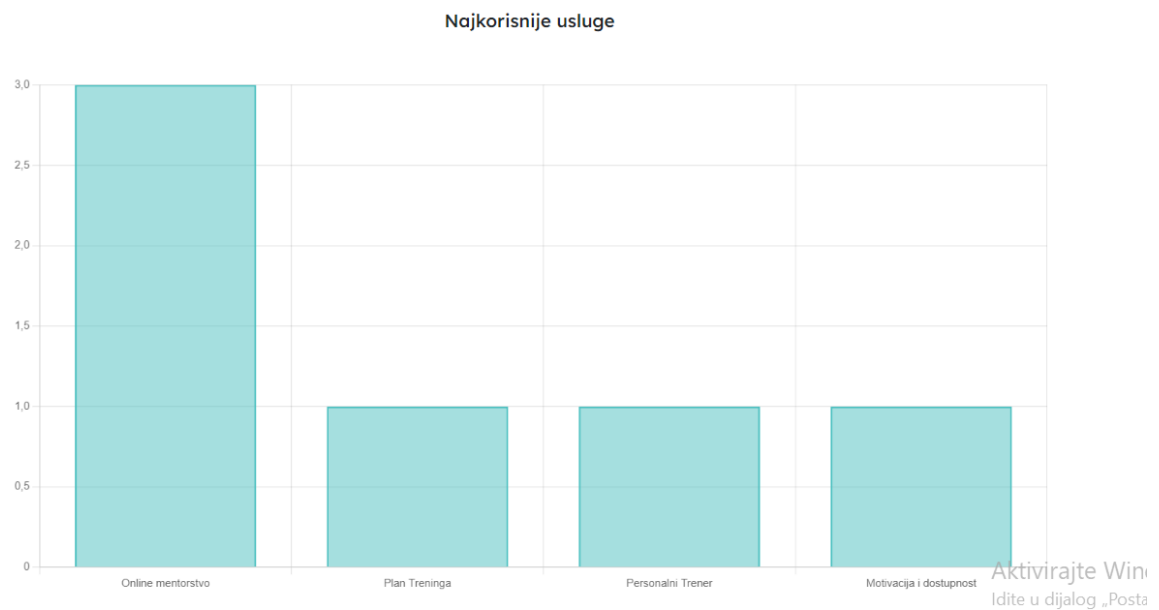

Na index stranici prikazujemo usluge i utiske korisnika koji se prikazuju na osnovu ankete koje popunjavaju prijavljeni korisnici. Da bi korisnici mogli da izaberu neku od usluga moraju biti prijavljeni. Imaju pravo da izaberu više usluga ali svaku od usluga samo jednom. Nakon što izaberu, čekaju admina da im aktivira određenu uslugu. Klikom na uslugu u novom prozoru prikazuje se usluga i njen opis ukoliko je već izabrana, obaveštavamo korisnika o tome.

Dinamički ispisane usluge sa mogućnošću filtriranja po kategoriji.

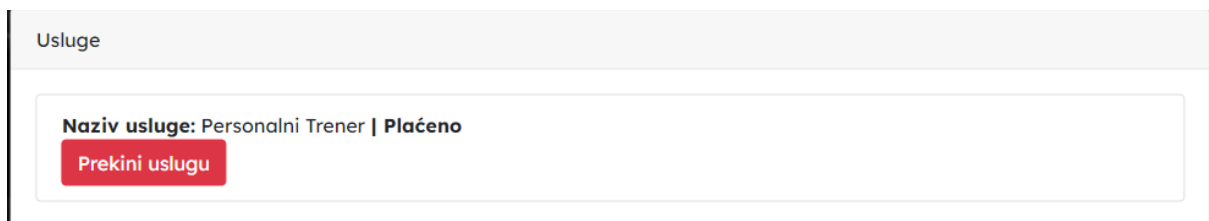

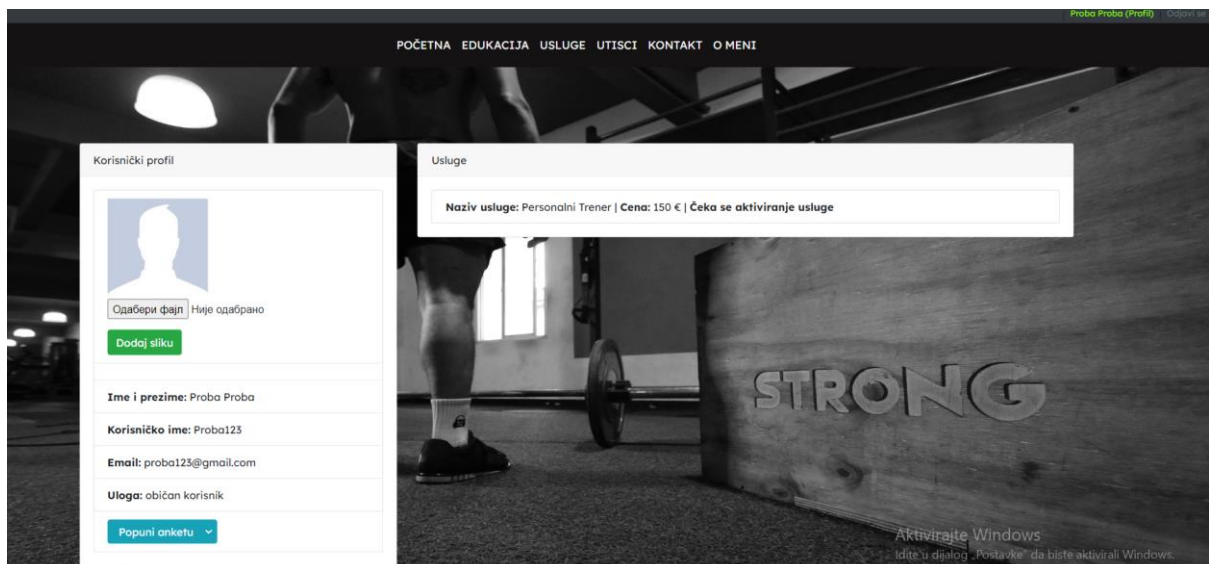

Prikaz izabrane usluge.

Prikaz glasova korisnika koji su već koristili određene usluge.

user_acount.php

Prikaz korisnikovog profila, njegovih podataka, usluga koje je izabrao. Mogućnost za popunjavanje anekete i dodavanje slike.

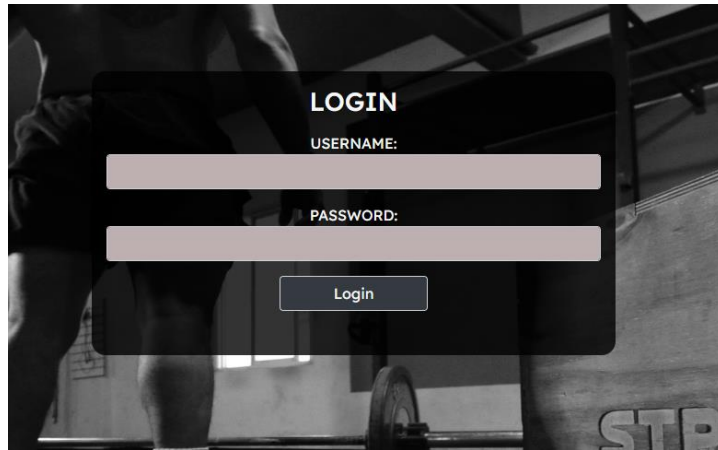

Register.php

Svi podaci su validirani i u javascriptu i u php-u. Ukoliko se unesu pogrešni podaci, obaveštavamo korisnika.

The screenshot shows a 'REGISTER' form with the following fields and validation messages:

- Name and surname:** A text input field with a red error message: *The first and last name must start with a capital letter*.
- Email:** A text input field containing '...@gmail.com'.
- Username:** A text input field.
- Password:** A text input field with a red error message: *Password must have at least one letter, number, special character and length greater than 8*.
- Confirm password:** A text input field.
- Register:** A button at the bottom of the form.

Nakon logovanja korisnika šaljem na index stranu.

Adminpanel.php

Ovoj stranici može da pristupi samo administrator. Tu imamo mogućnost dodavanja novih usluga, praćenje korisnika ažuriranja njihovih usluga. Informacije o anketi. Dodavanje i ažuriranje kategorija.

Dodaj kategoriju

Naziv kategorije:

Obriši kategoriju

Ažuriraj kategoriju

Kategorija:

Novi naziv kategorije:

Dodaj uslugu

Naziv usluge:

Ikonica:

Opis usluge:
